The venerable campaigner, now Republican national committeeman, did control all patronage on the Eastern Shore. He split with Senator Weller and is now one of the triumvirate of powerful backers of the Hill candidacy. But this is all dry territory, with an aridity which no moisture from the bay can diminish, and Hill is "wringing wet," while Weller, if he is guilty of Hill's accusation, is only moderately so.

Jackson Can Not Deliver All.

There are local leaders against this year, but Goldsborough refused.

This pair of Goldsboroughs is of no kin, certainly not close, to Representative Goldsborough, the Democratic incumbent in the House from the Shore or First district, and who is opposed for renomination by Franklin Upshur.

You can FEEL the difference with this new oil in your Ford

HUNDREDS of road tests made with the new "Standard" Motor Oil in all types of cars prove that it represents a great advance in motor lubrication.

For instance, a Ford run 609 miles from September 24th to October 22d, 1925, showed 12.8% increase in oil mileage; 12.3% increase in gas mileage; increased power; snappier pick up; no drag on hills; removal of carbon deposits in motor.

Here's proof that the new "Standard" Motor Oil effectually solves the lubrication problems of every motorist. Get a crank case full and try it out yourself. You can actually feel the difference. At all "Standard" Service Stations and dealers.

SUPERPLANES COMING FROM ITALY FOR RACE

Speed of 245 Miles Reported; U. S. Faces Stiff Schneider Cup Competition.

Cup Competition.

The United States has its "job cut out" to take the final leg in the Schneider cup races October 24 at Hampton Roads, Va., and gain permanent possession of the air trophy raced for since 1913, it appeared, yesterday. The Navy Department learned that the Italian "mystery" planes which will contest America's right to the cup are reported to be capable of making 245 miles an hour.

The Italian ships will be of the monoplane type with twin pontons. Two of the three planes to be used will have Flat engines. The other will be equipped with a Napier-Lion engine, according to navy information. The United States will use the planes built for the Pulitzer races, which are being reconditioned. One of these planes in the last Schneider cup race made 232.5 miles an hour to take the race. Italy and the United States are tied, with two wins each.

Baltimore & Ohio

When you go to New York and when you return

You will appreciate the convenience of the new Baltimore & Ohio Train Connection Service, via motor coach between trainside at Jersey City and the Heart of New York City

Here is what this service improvement means to you-

When you arrive in New York you step from the train in Jersey City into the waiting motor coach and are taken to your real destination, the uptown hotel, business and shopping center, convenient to subway and surface lines. You have choice of two routes (see map) uptown or downtown with scheduled stops for the discharge of passengers.

When leaving New York you step aboard a commodious Baltimore & Ohio Motor Coach at either of two centrally located Coach Stations or at one of the stope on the routes. These coaches take you (and your hand-baggage) direct to the trainside in Jersey City, without delay or annoyance.

When you step aboard your Baltimore & Ohio Motor Coach you have made your train.

Your Baltimore & Ohio ticket entitles you to this added service without extra cost.

Coach Stations are located in the Pershing Square Building, on 42nd Street, just east of Park Avenue (directly opposite the Grand Central Terminal) and in the Waldorf-Astoria Hotel, 33rd Street side, corner of Astor Court.

Both stations are fully equipped for the sale of tickets and also provide facilities such as parcel checking, porter service and women's rest room.

With the inauguration of this new and improved travel service, the Baltimore & Ohio again gives evidence of its desire to provide its patrons with every convenience. Assurance that whenever and wherever you travel, via Baltimore & Ohio, your safety, comfort and well-being are the first consideration.

THE RESULT IN WISCONSIN.

The primary election in Wisconsin on the Republican side has resulted in the defeat of Senator Lenroot and the nomination of Fred R. Zimmerman for governor. Lenroot opposed the La Follette faction, and so did Zimmerman. The struggle between the La Follette or "Madison crowd" and their antagonists was bitter in the extreme, and there will be little difference between the senatorial and gubernatorial struggles in the degree of bitterness. The outcome, representing a victory for the La Follette faction in the senatorship fight and a defeat for it in the governorship fight, indicates that the Republicans of Wisconsin were swaged by considerations other than those involved in mere factionalism.

Gov. John J. Blaine, who has defeated Sena tor Leproot, attacked the latter for his stand on the world court proposal. If the Republicans of Wisconsin are opposed to the world court, this made Senator Lenroot peculiarly vulnerable, for he piloted the world court resolution through the Senate, organized the cioture which forced a vote upon it, and acted Senate, who were led by Senator Swanson of Virginia. In the closing days of his campaign Senator Lenroot laid special stress upon his championship of the world court proposal.

Wisconsin, however, is classed as a wet State, and Gov. Blaine's out-and-out opposition to the Velstead act no doubt attracted many etes, while Senator Lenroot's record on prohibition placed him in the dry class notwithstanding his willingness to abide by a referendum on the question of legalizing traffic in

The nomination of Zimmerman for governor is a decided setback to the La Follette machine in Wisconsin. If elected he will be in a pos stion to disable this machine in many vital parts. On the other hand, the possession of "the two senatorial seats will increase the in fluence of the Senate insurgents and render still more precarious the position of the Republican party in that body.

THE BUSINESS BAROMETER

No better barometer of business is to be found than the amount of freight handled by the railroads of a country. During the week country and August 28, the number of freight cars loaded reached 1.126,233, which was 11,795 more than for any previous week in the history of railroading.

During the war and after the armistice complaints were received from every section of the country as to the shortage of cars. That was due in the first instance to the demands of the government for transportation facilities tried to set up two standards of equality for war supplies and later because of the fact among nations, an absurdity which will probthat the operation of the roads by the railroad administration resulted in so much damage to league. the rolling stock that at one time there were about as many unserviceable freight cars as there were cars available for use. Now comes the report from the American Railway association that car loadings have exceeded the million mark in fourteen weeks during the present year, but that this heavy traffic is being carried without car shortage. The number of such ars in good repair and ready for immediate service at present exceeds 170,000, to haul which the roads have 5,500 locomotives also

available, which are in good repair, and which has not been necessary to place in service. The total number of carloads of revenuepaying freight hauled by the railroads during the seven months ended August 28 was 34, 699.511, exceeding the number for the same period of 1925 by 1.100,000.

CHARM.

At last it has come. College curriculums (or should it be curricula?) are crowded today with all sorts of subjects which never came within the ken of the founders of the great medieval universities. If these revered educators could once more revisit the glimpses of the moon, they would certainly be startled at some of the things that are being palmed off on the public in the name and under the auspices of the higher learning. But to the latest addition to the range of studies the would assuredly accord a benign smile and their most fervent benediction, for the new branch of knowledge covers that which the world has always needed most and has but eldom found, namely, Charm. Now, charm has hitherto been supposed to be a persona attribute and therefore something intangible incommunicable, and incapable of being aught. The Chicago Trade Union college however, evidently thinks differently, for it prospectus that goes into effect with the open-

ing of the coming fall semester. According to that document, charm is much, more than a mere matter of looking pleasant lative tendency boosts stocks and bonds, thus and eating with a fork-a proposition, any- requiring larger loans and greater volumes of how, which one would have thought to be credits and Federal reserve notes. All one can well standing before the war. say to the promoters of this new branch of learning is that the world is wide and the result disastrously if it is confined to stock and harvest ripe for the garnering.

GERMANY IN THE LEAGUE.

Germany was elected a member of the league of nations yesterday, and was simultaneously admitted to a permanent seat in the league council.

The immediate result of this action is to make effective the Locarno treaties. The fundamental treaty of Locarno is that in which Great Britain, Germany, France and Belgium mutually guarantee the maintenance of the frontiers between Belgium and Germany and between Germany and France, as fixed by the treaty of Versailles, and in which Germany, France and Belgium mutually agree that they will not attack or invade each other. The treaty furnishes the basis of conventions which provide for arbitration of disputes between Germany on the one side and France. Belgium. Czechoslovakia or Poland on the other. Two other Locarno treaties provide for mutual support by France and Poland and France and Czechoslovakia in case failure to observe any of the treaties is followed by unprovoked reourse to arms.

For the sake of obtaining this commitment on the part of Germany, France was willing that Germany should become her equal in the council and assembly of the league of nations. The first proposal that such an arrangement hould be made came from Germany early in 1925. The Locarno pacts were agreed to on October 16, 1925, and were formally signed London on December 1, 1925.

Efforts to admit Germany into the league were frustrated last March by Brazil, which demanded a permanent seat in the council. Failing to obtain this seat, Brazil gave notice of withdrawal from the league. On the eve of the present meeting of the league Spain demanded a permanent seat, but this was denied her and her withdrawal from the league is expected. Argentina has practically severed connection with the league.

The admission of Germany into the circle of great powers which dominate the league of nations can not fail to be followed by far eaching changes in European politics. The German nation is smarting under what it regards as grossly unjust provisions of the treaty of Versailles. Although Germany accepts the Franco-Belgian frontier line as fixed by the treaty, it has always protested against the frontier line on the east, which separates East Rrussia from the country and gives to Poland a region which Germany regards as purely German. In the treaty Germany admits her guilt in starting the war; and millions of Germans protest against this indictment. The treaty purports to place all colonial territory taken from Germany under the jurisdiction of the league of nations, and the league has distributed this territory to the great allied powers and Belgium as mandatories.

As the league under the covenant is still sovereign" over captured German territories. Germany is preparing to demand some of this territory on the ground that she is in need of raw materials, and must have room for colonial expansion. An active propagazida has been started in Germany preliminary to making a demand for a return of some of the colonies. But the powers holding mandates over former ferman territory are not in the least likely to ield possession, although officially they set up the plea that their overlordship is a heavy ourden and is solely for the good of the backvard peoples. With the nations in lively competition for sources of raw materials it is not o be expected that the mandate powers will surrender any advantages to Germany.

If the four great European powers-Great Britain, France, Italy and Germany-can agree among themselves, they can easily manipulate the league machinery in their own interests But they never have agreed among themselves for any length of time, and their interests are

as to insure disagreement. The mere creation of a league mechanism does not change the factors which make for disagreement, but on the contrary it creates new irritants in the shape of discriminations between nations in Europe. The league, in brushing aside obstacles to Germany's admission, has result in the eventual disruption of the

EXTRAVAGANCE OF STATES.

While the Federal government expenditures are steadily declining, the State expenditures are still steadily increasing. A recent survey shows that State expenditures last year totaled \$1.614.000.000, as compared with \$1,513,000,-000 in 1924 and only \$517,000,000 in 1917. The cost of State governments has increased 200 per cent in eight years. All but 7 of the 48 States showed a deficit in 1925

The net State debts in 1925 showed a total of about \$1,251,000,000. It was \$11.25 per capita in 1925, about \$10.64 per capita in 1924, and about \$4.93 per capita in 1917. Thus, while the Federal administration is succeeding in reducing both public expenditures and the public debt, the State governments are indulging in a riot of expenditures and debts.

Citizens who complain of high taxes and high cost of living should turn their attention to the real cause of their troubles-to the State governments. High State taxes increase cost of production, increase prices, and make living harder and more difficult.

LOANS TO SPECULATORS.

The Federal Reserve Board's weekly report of the condition of 697 banks shows that brokerage loans have increased \$114,388,541 in 30 days, making a total of \$2,997,759,527 on September 1, of which \$2,758,274,000 was in New York city alone. At the same time loans to industrial corporations decreased \$48,000,-

000 in 30 days. While the large brokerage loans were some \$143,366,000 below the highest level this year (January 6), they create a feeling of uneasiness among conservative financiers. The rate has given Charm a prominent place on the of discount has been increased to about 5 per cent, which will have a tendency to check

NEW HAMPSHIRE'S PRIMARY.

The renomination of Senator George H Moses, of New Hampshire, is equivalent to his reelection. New Hampshire has acted wisely in retaining him in the Senate, of which he is president pro tempore. He is a dreadfully outspoken man, quite as apt to embarrass his Republican associates as he is to paralyze the opposition, but as he uses truth as his missiles. and barbs it with wit, nobody in the Senate cares to call him to account.

Senator Moses is chairman of the committee on postoffices, and is a member of the committees on foreign relations, printing, and rules. He has a habit of acquiring accurate information which he springs upon unsuspecting senators and committee witnesses. He served in the diplomatic corps once, and is not too cruel with the Harvard boys who have made a snug harbor of the State Department and who are the only Americans who know how to maintain the dignity of the service, you understand. Of course, Senator Moses opposed the league of nations and voted against the world court resolution, but he was not spiteful in his exposure of the hypocrisy of it all. He merely grinned as he stripped off Mars' cloak.

The aggregate amount of Senator Moses expenditure in the campaign just ended was something like \$87.45. There were rumors of debauchery in the New Hampshire primaries, and nineteen outside detectives were said to be investigating the scandal. The sum spent by Senator Moses lends color to the suspicion that New England is joining in the saturnalia of corruption which threatens to bring down the pillars of Republicanism. Senator Ashurst is in duty bound to take cognizance of this scandalous squandering of money in New Hampshire. It was absolutely unnecessary Senator Moses would have been renominated if he had not spent a cent. Where did that \$87.45 of New England money go, and who got it?

LOCATE THE PROCRASTINATOR.

To whom should be given the blame for the failure to distribute the extra compensation to Federal employes on the retired list as authorized by Congress? The payments, when made, will be disbursed through the pension office. Shortly after the passage of the law the commissioner of pensions had prepared and distributed to the various departments an order in which it was set forth that the pention office would accept the "present record in each case as the basis for readigdication," except that a call would be made upon the departments for statements as to the leave of absence taken by the annultant during his active service if leave thus taken exceeded six months in any calendar year, as the new law specifies that such excess leaves shall be excluded in computing the length of service of the beneficiary

The records of the pension office reveal that there were 12,524 annuitants on the rolls on the first day of the current fiscal year. It cems, too, that the office charged with the duty of paying the annuities has sent out to the departments 10,000 calls for statements as to the status of the annuitants in the matter of excess leave of absence. There have been received thus far only 4,000 replies, although two months have elapsed since the order from the pension commissioner was pro-The pension office, therefore, is mulgated. not entitled to all the blame for the delay It seems to be up to the other departments to make the next move.

It is not a valid excuse to assert that the annuitants-more than 10,000 in number-are at present receiving part of their compensation and that when the departments "get around" to the business of responding to the call for required information those lucky souls will get the extra allowance "all in a lump." The heads of all the departments should take steps to expedite replies to the call from the commissioner of pensions and thereby facilitate the work of that office. The rest will be easy.

The Worst Story I Heard Today-By Will Rogers

The Worst Joke I heard today was told to me by Miss Belle Astaire, of the Astaires. You know them, the brother and sister, Fred and Belle Astaire, who have made such a tremendous hit in "Lady Be Good." They are over here in London now, and they are a very big success. She was out to the Studio today with Miss Dorothy Gish, who I am playing in a Picture with. You know when an Actor or an Actress has nothing else to do they go and see some other one work. She had her Mother with her and I didn't get any real chance to have a good chat with her. At the table I heard the following and advised her at the finish to go into her dance.

"I hear young Smith has gone on the stage for good now. How is he doing?"

"Jolly well, I hear," said the friend. "They say he is making a great hit as a Male Impersonator." The Worst Joke I heard today was told to

TWO MORE YOUTHS HELD IN COUNTERFEITING CASE TODAY'S SUN AND TIDE TABLE

Tilden Harris, 18, Son of Capitol Heights Constable, Is Placed Under Arrest.

FOURTH IS BEING SOUGHT

Two more Maryland youths were arrested yesterday by Treasury Department secret service operatives in connection with the manufacture and disposal of counterfeit 50-cent pieces. Another, believed to be involved in the attempt, was still at large last night, secret service offi-

According to relatives of young Harris, the youth was given about fifteen of the coins by a friend, who told him he had found them in the furnace of a house at which he had boarded. Harris kept them in his home with no intention of disposing of them, they said. A few nights ago, they said, Harris gave some of the coins to Burleson, who was calling at the house, first exacting a promise that he would not attempt to pass them.

Six of the coins are in the possession of United States Secret Service
Chief Moran and are poor reproductions and capable of easy detection.

Flying Wenther Forecast.

The machinery used in their manufacture has not yet been located. Chief Moran said, and the investigation will continue.

Young Burleson was turned over to Maryland atuhorities yesterday morning by police of the Eighth precinct, who were holding him for secret service operatives. All of the youths will be tried by a Maryland tribunal, as the alleged "overt act" was committed in Maryland. Chief Moran said.

WIVES OF TOMORROW

By FRANCES M'DONALD-

Well. John, you are 45 and as ingenious as a child. Truly the sheer simplicity with which a man will state what he considers his story

is one of the many marvels that hu

EAR Miss McDonald: Do you I may say that probably I'm better care to give any advice in the following case—here are the pearance, but I now know that looks particulars. I'm a Scotchman, single, a-building mechanic. I am 45 years of age. I've traveled considerably, been in Australia, New Zealand and South Sea islands. I'm somewhere about the seventh in among eleven of the same brothers and sisters, but I'm the &c. Yours truly.

ingenious as a child

I've been in love about two times and lost. On the other hand there were six or seven girls who loved me, but the feeling I had was, that I didn't care though I never saw them again, and the only result was

some painful moments.

Lately, generally before going to sleep of a night, I've begun to think of my friendless position, and think sleep of a night. I've begun to think a woman would say that she "realized she should be making some man happy" or invent some other some real friends. I've never had a strong liking for pals and cronies and seem to get on quite well either with or without them. I can interest myself with most anything, from est myself with most anything, from the same—because you are a man watching a prize fight, or golf tour- and a child despite 45 years, two watching a prize fight, or golf tour-nament, or musical comedy to read-ing George Eliot, W. Cone, or the latest textbook on food and diet. Even the Encyclopedia Britannica, can hold me for liours. An elderly casual acquaintance some little time ago said I was leading a very selfish life, and that I would suffer for it later on.
Tell me, Miss McDonald, after taking the above facts into consideration, if you think it would be advisable for me to get married. It isn't half bad. Certainly better than lying awake nights better than lying awake nights let her make a good, obedient husband of you. You'll find it lots nicer being a husband than just a "building mechanic aged 45."

Best of luck to you and any other latest and six girls who loved you!

Doubtless the first corn, the first callous, struck its owner as being shocking, but that feeling has long since passed away.

In France, we know, women visit the chiropodist almost as frequently as they do the manicurist—even women in very modest circumstances. Here we wait until we are in serious trouble—a great mistake. The least we should do is to plan to pay such visits semilocasionally, reinforcing them with weekly care of the feet muscles.

After a hot bath, during which the feet have been benefited by a hard brushing all over with a rather stiff brush, the toe nails should be cut—not in pointed or even rounded outline, as we cut the finger nails, but straight across. They should then be filed smooth and carefully cleaned, and the cuticle should be nusshed back rather than least we result in the first corn, the first went some 40 miles from Palm Beach, motoring to a little inn that stood on a long beach and where the food was good, the bathing and fishing excellent. she said dispiritedly. "There's no harm in seeing other women be-side your wife."

It seemed logical. Yet, deep in her soul, it went against her grain. No man had interested her, not even for a fleeting moment, since she had stood up in front of the altar and taken her marriage vows, with absolute sincerity. She supposed, with a half sigh and an ironic smile, that it was because she was middle-class. Decent, hard working, middle-class, married people centered their lives on each other, and didn't bother with other people's husbands and wives. Coming to the Theaters

In the field of banking and insurance, Federal figures indicate, the overwhelming prosperity of 1926 will be shared by about 65,000 corporations, but out of that large group 100 mammoth companies will split among them approximately one-fourth of the profits. These 100 concerns, directed and officered by about 3,000 men, are centralized in New York, Pennsylvania, California and Illinois, for the most part. A secondary group of 175 somewhat smaller banking and insurance companies also will make large profits.

All told, these two groups of bigapital companies will divide somewhat more than one-third of the banking and insurance profits of 1926, unless the year shows unexpected upsets in form. The remaining companies, numbering more than 64,500, will distribute the rest of the profits, or about two-thirds.

Motors and Steel Lead

New York, Sept. 8.—Losses far outnumbered gains in active stocks at the close of a jagged stock market session today, recessions of 2 or 3 points or more being freely distributed throughout the list. The market had a flat opening, but The market had a flat opening, but soon sharp reactions were following on the heels of impressive spurts, particularly in the industrial shares—which did the leading. Railroad stocks were sluggish derairoad stocks were singsish despite the announcement late on Tuesday that car loadings for the week ended August 28 were the largest in history. Dealings on the whole were in increased volume, transactions topping the 2,000,000-

share level.

General Motors, which came to life abruptly in the preceding session, again featured trading, and in the afternoon approached closely its peak price, touching 222 more than 4 points above the previous closing level. But in the last few minutes the stock, with United States Steel common, which also had been gaining persistently, led a sharp recession which more than wiped out the day's advances in these market leaders and in other of the more active issues.

000 shares, followed the example of the premier automobile stock down and up, up and down, attaining a new high, at one stage, for the second day in succession.

Du Pont, Pullman. Woolworth and similar volatile issues which

scored sharp advances in Tuesday's trading, were less active and closed at substantial recessions. The motors group in general moved up-erratically as its leader; Nash and Studebaker held fairly firm, al-though the latter finished fraction-ally net lower, but Jordan Motors, on which the common dividend was passed today, skidded sharply, carrying other issues with it, and osed 2 % off.

Kansas City Southern touched a

Ransas City Southern touched a new high price, and closed near the top, 1% up, but the other rails opened lower and dropped through-out the session. Atchison and Rock Island lost 1½, New York Central a point, Union Pacific 1¼, Mis-souri Pacific and Norfolk & West-

sour Pacific and Nortok & West-ern 1½, and Atlantic Coast Line 3 points.

In many directions active shares showed a tendency to move by themselves, without any relation to other members of their group, or to the market as a whole. Radio and Westinghouse Air Brake, although they failed to hold up, the latter ending 21/4 net lower, reach-ed new highs for the year in the early trading without the aid of any surface news to account for such

Strong advances were made also by Warner Pictures A, which closed 3 points up; General Asphalt pre-derred, 3½ higher; Postum Cereal, South Porto Rico Sugar and some few others. Loose-Wiles issues skyrocketed, both reaching new highs. The common, at one time more than 13 points higher, closed 10% up, and the second preferred advanced 12 points

A lively rally in sterling, partly due to the psychological effect of the arrival of more gold for Bank of England account at San Francisco and partly to lighter offerings of commercial bills, together with a slight sinking spell in francs and lire, were the features of a quiet market in foreign exchange. The Italian rate finished 7 points lower. Pesetas improved 2 points. In the Far East group yen made a new high for several years. high for several years.

Buying against bids brought about the slight recovery toward the finish. Export sales were estimated at around 500,000 bushels in all positions.

Corn displayed independent firmness, but friends of higher prices were hampered by the weakness in wheat which cooled the enthusiasm of buyers to a considerable extent. Sentiment is growing more bullish owing to continued wet weather over the belt and a forecast of further raists were affected by the action of the grains but moved within relatively narrow limits.

Scattered commission house buying of lard and a falling off in hog reints gave provisions a slightly firmer undertone.

What's Behind Your Stock

United States Realty and Improvement Company. The United States Realty & Im-

provement Co., which has been in existence since 1904, is engaged in the real estate business. In its own name, or through subsidiary companies, it owns much valuable real estate in New York city, principally in the Fifty-ninth street and Wall street districts. This real es-tate includes a number of office buildings. The George A. Fuller Co., a subsidiary, is engaged in the construction business.

During the ten years which ended

in 1925, annual average net profits available for common dividends, available for common dividends, after allowing for preferred dividends then in existence, amounted to \$1,919,435. This was equal to an average of 11.4 per cent on the common stock. In 1925 the common stock was changed from a \$100 to a no-par value, and the 7 per cent preferred cumulative stock issue was converted into common. sue was converted into common stock. Fillmore was President when the Associated System was Founded

Millard Fillmore was born in Cayuga County, New York, which is served by the original property of the Associated System. He went to the primitive school in the neighborhood three months a year and worked on his father's farm nine months.

At the age of nineteen he decided to become a lawyer. While in the New York State Legislature in 1831 he was the author of the bill passed that year abolishing imprisonment for debt.

Fillmore was President of the United States from 1850 to 1852. In the latter year the Associated System was founded. Since then great changes have taken place in our ways of living.

DEMPSEY today went through a long and industrious period of loafing on the second day of rest here from the training grind. He got up early, took a light session on the road and returned for the fifty-ninth renewal of his championship checker game with Mike Trant, his Chicago companion.

After Trant had been well beaten. according to the champion's own version, they went fishing along the shore. Unofficial observers report prehension about the procedure to Dempsey's only catches were two fish too small to keep. Next he took a sun bath in the yard of Ker-ry cottage, allowing a hot noonday sun to burn his already bronzed skin a slightly darker hue.

This afternoon he went for a moor ride with Trant and returned to the cottage for more checkers and pinochle after dinner. Friday he will begin the final drive which he expects to condition him for Tunner.

Jerry Luvadis, his faithful personal attendant; Capt. Charles Mabbutt, of the army, boxing instructor at Camp Holabird, Md., and Normile. Wilson is regarded as an expert second, capable of making the most of the minute's rest between rounds, and also injudging the fighter in the opposite corner. Normile is not accustomed to the exciting responsibilities of the Queensbury firing line, but he decided to go into the corner to give Dempsey moral support. Jerry the Greek has been in Jack's corner in two engagements, the Tommy Gibson is a constant of the minute's rest between rounds, and also injudging the finer pursuits when one has more assessment one has some cases made four hits necessary to some a run. These Venetian rules ruined the added novelty of outer gardeners covering the sacks on ordinary plays. Toward the end of the fracas, the tide went out considerably enabling the fly chasers to drift back a few feet, but not sufficiently to call for any rule amendments.

THE batters spent the afternoon aiming for the wet spots, while Altrock and Schacht did their best to distract the fans' attention from the game. A capacity crowd of about 2,500 was on hand. The fans seemed to get their greatest kick out of Uncle Nick's first base playing after he relieved Judge in the fourth. Twice the comedian made outs while sitting on the cushion.

### IS TAKEN BY CORONACH AFFAIR

### English Turf Record Mitchell Youths May Equaled by Derby Winner.

DONCASTER, England, Sept. 8 (By A. P.).—Lord Woollavington's Coronach, ridden by J. Childs, today won the rich St. Leger stakes from eleven others, and proved himself the best 3-year-old in training on the British turf.

Incidentally, he equaled the record, which had stood since 1903, of a horse winning the derby and the St. Leger in the same year. The record was previously held by Rocksand.

Lord Derby's Caissot gave the derby winner a good run, finishing two lengths behind Coronach and six lengths ahead of Somerville Tattersall's filly, Foliation. The American, A. K. McComber's Masked Ruler, failed to come up to his owner's expectations.

Tappears as though the scrap for the Harding Memorial cup for junior players at the Chevy Chase club will develop into a familic cated upon the showing of the play-end and Tuesday.

Of course, only the first two orling on anything may happen before the finals are reached, but in the opinion of those watching the play, the word is that Dooley Mitchell and his brother Jimmy will be the finalists.

Dooley is well enough known to every tennis fan in town to rob this statement of prophetic qualities, being equivalent to saying "it looks as if the Yankees will win this year," but it is Jimmy's showing that has knocked the boys out from.

### Cardinal A. C. Stops Firemen Team, 3-1

Alexandria, Va., Sept. 8.— The No. 5 Motor Co. dropped its second straight game today, losing to the Cardinal A. C., 3 to 1. Jimmy Quayle let the losers down with only one hit, while Butler, of the losers, also pitched a good game, allowing four safeties.

Lou Little, who is producing the 1926 football edition of Georgetown University here, found his players in such good physical shape today that he called a halt on the rough stuff and let them off easy with a light afternoon drill.

Some of the boys were discovered to be in that condition which the athletic trainers term "too fine," and they were excused all day.

Tomorrow is another day, however, and git will be back again to the old grind, with two sessions of scrimmaging on the program. Little and his assistant coaches believe that these workouts will turn up much information as to who is who in camp, and that if any of the scrubs are good enough to make the first team, then will be the time to find out.

SOCCER TEAM TO PLAY.

The German-American Football
club will journey to Baltimore Sunday for a game with the Wingfoot
Soccer club at Patterson park. A
silver cup will be awarded to the
winning club and the local booters
are confident of returning with the
trophy.

In the first game of the play-off or the championship of the Banker's league, the Riggs team defeated American Security, 9 to 4, yesterday. Wormley fanned nine batters for the winners, four coming in a row. Ellis, Mensh and Raulsing starred at bat.

The second game of the series will be played Saturday on diamond No. 3.

## FRENCH BONDS ATTAIN YEAR'S HIGHEST PRICES

Other Foreign Issues Strong, While Domestic Section Is Dull.

## OFFERINGS LIGHT

New York, Sept. 8 (By the Associated Press).—The pronounced strength of foreign bonds, more than a dozen of which sold at the year's highest prices, stood out today in striking contrast to the duliness of domestic issues. Recause of the broadening demand for foreign obligations the market developed the greatest display of activity in several weeks.

The burial of war animosities with Germany's election to the League of Nations and indications that France and Belgium would soon be able to arrange loans for stabilization purposes contributed to the revival of interest in European bonds. The best prices of the year were attained by an even dozen French issues, including the government's 8s, all the French railroad Hens listed on the New York Stock Exchange, the French National Steamship 7s, the Lyons, Bordeaux and Marseilles 6s, Seine 7s and Framerican 7½s. Other strong features were the German municipals. Upper Austria 7s and Tyrol Power 7½s.

A survey by one investment house revealed that few important bond offerings were in prospect for the next month, although several routine corporate issues are scheduled for early appearance. Today's individual offerings were small but

uled for early appearance. Today's individual offerings were small but they aggregated about \$40,000,000 and were promptly subscribed.

The average price of domestic bonds was slightly lower, but a few

points of strength appeared. Most conspicuous of these were Andes Copper 7s, which rose more than a point to a new high record at 108 and Federated Metals 7s, which advanced 2 points. Skelly Oil 6 1/2 s reacted more than 12 points on profit taking.

New offerings scheduled for tomorrow include \$3,000,000 serial 6 per cent bonds of the Seaboard Terminal & Refrigeration Co., priced to yield better than 6 per cent, and \$23.000,000 Shawiningan Water & Power Co. 29-year 5 per cent bends, priced at 102 ½.

Oil City, Pa. Sept. 8 (By A. P.).— Credit balance, \$3.20; runs, 139,154; average runs, 55,531; shipments, 212,-855; average shipments, 62,181.

Removal of the farmers' market by January 1 from the western half New Beauty Contest

Removal of the farmers' market by January 1 from the western half of the site it now occupies was formally asked of the District commissioners yesterday in a letter signed by C. S. Dewey, Assistant Secretary of the Treasury.

Mr. Dewey said that if the District desired to preserve the sheds for use on another site and lacked the money to move them from where they now are, the expense could be met by the Treasury Department from its appropriation for erection of the internal revenue building.

Lieut. Col. J. Franklin Bell, engineer commissioner, said taking down of the sheds was the smallest of the ftems in connection with moving the market.

More than 3,000 lovers of flowers were visitors at the Federal-American National Bank last night drawn there by the annual flower show conducted by that institution each year.

While the judging of the more than 300 exhibits had been done on Tuesday night, and the winners of the fifteen prizes in gold announced by John Poole, president of the bank, interest in the floral dispiay showed no signs of diminishing, and officers of the numerous local garden clubs were loud in their praise of the opportunity which the flower show gave to amateur growers to exhibit and the public to view. The annual flower show of the hank was originally limited to exhibits of zinnias grown from seeds which the institution gave out. This was changed somewhat last year, competitors not being restricted to bank seed only. Encouraged by the success of the 1925 show, officers of the bank determined to broaden the field of exhibits, with the result that the show which closed last night not only took in zinnias in all varieties and colors, but included mixed autumn flowers, and prizes for the most beautiful varieties of asters, cosmos, dahlias, gladiolas and marigolds were given.

was filed yesterday in the District Supreme court by Edwin W. Davis, president of Davis, Wick, Rosengarten Co., Inc., contractors.

The petitioner contends that he has an interest of \$39 in the \$3-000,000 and that the court lacked jurisdiction to give away money which belonged to him in a suit in which he was not a party.

By arrangement of counsel a hearing on the application to rescind the compromise has been scheduled for September 17, although it had been noticed for tomorrow.
